

CIS175 Java II Weekly Assessment Report for JoAnn Weaver Week 5

Learning Objectives:	AJAX – learn and try out
Learning Resources: (List what resources you used throughout the week)	<ul style="list-style-type: none">• Code school• YouTube videos• WC3 schools
Evidence of Accomplishment: (How are you proving to the instructor that you used the learning resources and met the objectives? For example, how does the project you are submitted demonstrate the learning objective?)	Watched and executed code examples. Created with xmlhttprequest and then created similar list with jquery ajax.
Criteria and Means of Validating Evidence: (What criteria should the instructor use to validate your evidence?)	Generated webpage for Instructor to verify the AJAX executes.
Score Earned & Justification (What score out of 50 does this project deserve? Why does the project deserve the score you've provided?)	<div>50 /50</div> <p>Justification: After researching and watching tutorials, I executed the examples including troubleshooting my errors. I then created similar updates with jquery ajax.</p>
Conclusion: (Lessons learned/comments/was the learning objective met?)	I have a basic understanding of ajax, can identify and write entry level code to get JSON data and update the DOM using both the ajax request and ajax with JQuery.
